

Flexible Benchtop Automated Optical Inspection

Nordson YESTECH BX AOI

The Nordson YESTECH BX AOI offers off-line benchtop PCB inspection with exceptional defect coverage. This flexible benchtop system inspects solder joints and verifies correct part assembly enabling users to improve quality and increase throughput.

Lead Solder Pin Inspection

Selective Solder Inspection

Solder Ball Detection

Solder Fillet Quality Inspection

8 micron pixels

Lead Pin Inspection

12.5 micron pixels

Extra material Detection (FOD Detection)
